

KSL Newsletter 07/08

Dear customers, agents and friends of our company,

I am glad to present the second edition of our KSL Newsletter today. As announced previously, it will be issued on a regular basis and will inform you about all kind of news concerning our company and its products.

Enjoy reading our newsletter!
Yours sincerely,

Robert Keilmann
Managing Director

Content:

1. KL 200 Filtertube Sewing Unit
2. RS 590 3D Ultrasonic Cutting Unit
3. KSL Summer Party
4. Exhibitions and Fairs 2008

1. KL 200 Filtertube Sewing Unit

On the pictures you can see our highly productive and flexible filter tube sewing unit KL 200 which is used for the production of filter tubes via stitching or welding. Within short time the stitching unit can be changed over to a welding unit.

Besides the conventional processing of filter tubes, sewing with an overlapping seam, KSL also offers the option "double fell seam". A great deal of complementary equipment enables our customer to choose an individual set-up of his machine.

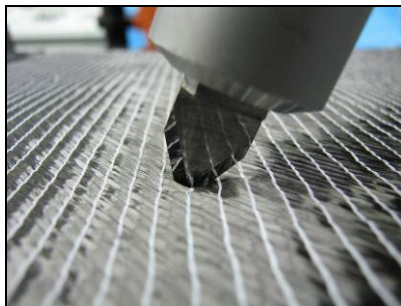

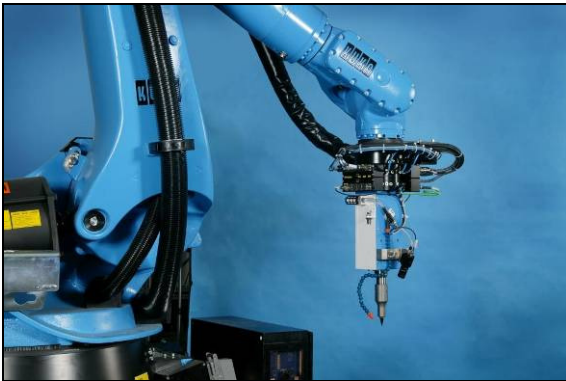

2. RS 590 3D Ultrasonic Cutting Unit

Herewith we would like to present our new ultrasonic cutting unit for the cutting of 2D and 3D structures.

This cutting device is driven by ultrasonic vibration and can be integrated into a robot unit. It offers the advantage of cutting without exerting pressure on the material, so that an optimal utilization of the material can be achieved. It also allows highly accurate cutting edges. Carbon and glass fibre can be cut as well as certain synthetic material or textiles. Depending on the material it is possible to reach a cutting speed of up to 20 meters per minute.

The cutting head is fixed to the robot via a quick change system and can thus be retrofitted at any time. We have an exhibited machine available at KSL to perform cutting trials with customer material.

3. KSL Summer Party

Our yearly summer party will take place on August 8. As every year, colleagues and family members of KSL and its affiliates are more than welcome to join the celebration.

4. Exhibitions and Fairs 2008

SAMPE Europe Technical Conference – SETEC 03/08

Augsburg Congress & Exhibition Center, Augsburg, Germany
18-19 September 2008

Airbag 2008

9th International Symposium and Exhibition on Sophisticated Car Occupant Safety Systems
Presented by Fraunhofer ICT, Karlsruhe, Germany
1-3 December 2008
